# ODEON

design R & D Poltrona Frau

Designed to satisfy the most contemporary needs of cinema goers, **Odeon** stands out for its rigorous form and great comfort.

It was conceived to furnish the old Odeon Café that dates back to the thirties, recently converted into one of the most extraordinary Italian cinemas, *The Space Odeon* in the heart of Milan, just a stone's throw from the Duomo.

**Odeon** has a headrest with extra padding and generous armrests. The fine stitching on the back and seat highlight the surface of this armchair, lending its softness and elegance.

The seat preserves the timeless appeal of the setting it was designed for, while driving towards high, new levels of functionality.

Fitted with an electric mechanism that reclines the seat back and lifts the footrest, its frame is in seasoned beech-wood. Suspension for the seat is provided by elastic belt webbing while the fire-retardant polyurethane foam padding is in line with the most modern of technologies. The base is in wood.

Upholstery is in Pelle Frau leather® in colours from the collection and other options are available on request.

**Odeon** can be customised with a glass tray fitted to the front of the armrest. The mechanism controls are built into the armrest and the surrounding plate comes in a colour that matches the upholstery or in chrome. Correct electricity absorption by the actuators is managed by a 220V or 110V control unit, the voltage depending on destination.

**Odeon** can have different uses, from cinemas to projection rooms, lounges to clubs, private, public and corporate situations and offers various configurations that can be modulated to suit available space.
